

GAMA Healthcare – Clinical training and support.

Empowering each other to reduce infections through education, knowledge and support.

We are committed to providing first class training and support to all our customers. Our training options include:

GAMA's engaging, interactive training programs are developed in collaboration with leading international and local infection prevention specialists. Every aspect of your training can be customised to meet your specific needs.

Training is delivered by our team of expert Clinical Nurse Educators using a range of formats from face to face training, on-line learning, webinars or short animations. Professional and experienced, they work closely with your own Infection Prevention team to create a bespoke training package.

Face to face training

Our Clinical Education Team is available to deliver training and support, adapted to meet your needs. This can be:

5 minute 'roaming' opportunistic in-services

Suited to areas such as ED, ICU or wards where staff can not get away to attend training. Covers basics on how to use our products appropriately.

1 hour clinical presentations

Often requested by infection prevention link nurses, or clinical staff wanting more comprehensive information, utilising the latest research, evidence and guidelines to support best practice in your facility.

20-30 minute in-service

Ideal for handover or staff meetings. These sessions will cover best practice and guidelines, as well as how to use products correctly.

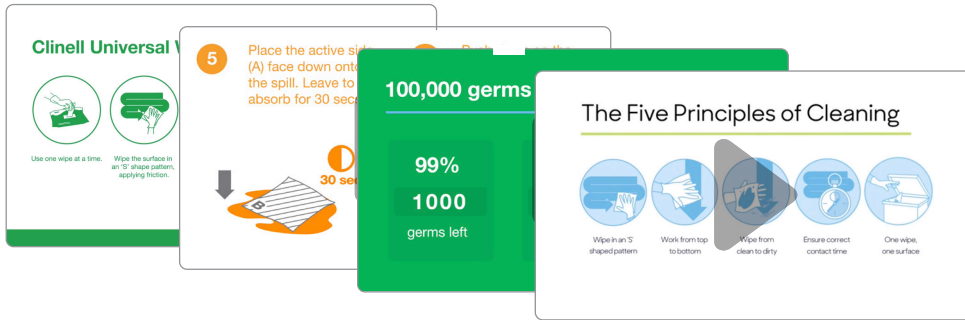

1 hour workshops

A suite of interactive workshops designed to meet your specific needs. These workshops cover practical activities which will help to enhance learning.

Training Videos

Our team has produced a range of short training videos to support your learning. Topics include basic Infection Prevention information as well as instructions for correct use of our products.

Webinars

We have a library of webinars available, with recordings available to view on demand. Please click the link below if you wish to view.
